## The Oregorian. PORTLAND, SATULDIY FIX. 27, 1880.

The lighting and characteristic cishonesty of scrub pourmilism flustrates itself every day, and im many ways. It is pitiful, contemptible, but pythaps hardly worth indignant reministration of N vertheless, there are times when it may as well be characterized as it deserves. The scrubes all of the effect of the treatment they receive from The Oursion is two years. the treatment they receive from THE CHEMONI IS But hey are artitled to nothing better. Thou Et. they are are mused to nothing occurs. They columns are filled in two ways firs, with news taken directly from The Outsconday, and spid ond, by musrepresentation of The Outsconday is estatements. Here, for manner, is the Standard, after the so-called News chief of scrub journals. is attempts to be a newspaper, first, by reprinting matter from. The Obroonian, and second, by misrepresenting in a most shallow and unst pitituily dishonest manner TER UREGONIAN'S otements \_stributing to it what it never said. ely perverting the meaning and intent

Here is a case in point. No. long ago Tax Origonian, in its local columns, reported an interview with Capt Carroll of the steamer I sho, in which that officer expressed the or interview that he was detained at Port Townsend "because the collector there feared that officials of the collector there feared that officials of the collector that off at Portland might make a discovery of opium at Portland might make a discovery of opinion and thus deprite the Port Townsead officers of a part of their motety. On this statement it a tendard has been harping ever since, attributing Carroll's remark to Tree Oragonias, and reflerating it as proof that This Oragonias, in agnorance of the fact that the mosty law had Leen repealed, was actions to serribe unworthy motives to democratic officials, etc., etc., and yesterday against in 1-2 special addiscration the subject, saying that The Origonalas, "if a spirit of detraction, made an unjust instituation aguine! ( ) liector Boscher, trying to discredit the rew democratic admir istration of the customers service in this jart of the condry, 'and ending by provide of the information that the molety hw under which it was asserted that (offerto: Beecher w and be benefited, was repealed sev rnl years ago "

This is a very fair illustration of the character

and methods of sc. ub ; arralism. The pull is duffired the office of knows that this paper, the local columns, menely tenorised (arrelies statement yet be less been carping about it iver since a ne attentionally failed assumption that it was The One Onen's own statement. It may be remarked here that the editor of this has enflicient cause to know that the money have expired on the 30th of June, 13 ± Bad it continued even a month longer it would have brought him over \$11,000, that went into he tiers ry of the linited States.

The bogus, Year, of which we have received from some onesa marked copy, whereby we a reminded that it is still printed, pursues the same methods of sorns journation. In the same memons of sorne journation. In the copy referred to we find certain afteged "rescutions," which it says emmasted from a spicial committee on the thinese question appointed by he legislature of Washington formory, and in which The Chaptonian is declared to have been tablated, for harms, blesser to the committee of the commi and 'cattle,' to the injury of the good name of the territory o' Washington. The statement is resell suited to scene journalism and equally befus the bogus journal, since the 'resolutions' presented are themselves bogos, that is to say they were never not forth by the against one of Washington territory or by any comma the thereof Our correspondent at Oympis ully But it is emin mt ; characteristic of bogus and serub journs isn to rapes? It if course the inguistrate of Weshington has not done a thing of this kind. The OREC MAN reported with parket truth the proceedings of the monguinst the Chasse at Taxona and eathle Nothing treputed on the subject has ever been controveries, or ever will be

Of course no paper can dishu infallibility for all it contains and The Oddoonias certainly free not. In the burry of preparing matter for the press, occasional stips and errors are need table. But this descounts intends always to be correct, and it makes extraordmary exertions. always to sectine correctness. Hence there is infinitely more labor in reporting and writing for it than for any other paper published norsher reporter and writer is specially charged that it will not have a laboratory in the mistakes. A mistake in the Object was is heard from at once in the Yeas the Year way und her south jour nals, mistakes or misstatement amount to noth ing. As a consequence of long off art to produce a trustworthy journal THE (PARGONIAN always has general credit. Its success as a newspaper is dist. The fact that it contains the news, and that what its contains may be depended on. It has its enemnes, but even they news doubt the substantial accuracy of its statements, an I they read it because they must have the news, and must be sure that they obtain full and brust-

worthy reports of what is going on Scrub journalism in the Ndrthwest is a ways on the bunt for two things, we have for The Okasons and news, and second, for space-THE ORIGINAL AS I HOW, and second, for square-ments in the rotonine with it imay carp an or persect. This is the mission of sexub journal ism. Herein is its life. Any lit is inaccuracy of statement, in The ORE as its, though the slip be patent on its face, all rules cuple prair-nial for comment by the scrib journals. They give to such matters editoria, space, and bype to get celebrity by pointing out the most triding and me ateroal errors. Some days ago, in an ilem about an attempt to commut a marker is Washington county, the name of Hillsborn was lofty superfority, have expressed wonder that THE URSHOMAN should be under the editorial direction of a fool who does hot know one place in the state from another Again if there is any possible way of place

Again is the same presenting anything printed by The Descondan the ecrols representing anything child matinally exhibit more industry in that behal than in anything else they undertake To distort any statemen; that has appeared in its columns and then comment, with similar dishonesty, on their own distorted statements, is their special giver and dright. It is the unfathing resource of that in matter that is capable of southing else. The tandard and News of Port and set the example and piles the

northwest are of this description. There are many honerable and worthy excepti ful indestrious, conscientions and paints airing journals, that do their work well and are a o the communities in which they are ed. To their merits THE OREGONIAN cheering adde its testimony, always. The other sort it notices as ittle as possible, but when it does notice them it cannot in decency. expressions of contempt which they so richly deserve

### "A L. SINNAS BARGMETEL

Off cial figures and estimates show that the of the I nited States are unerrpostal revenues of the United States are truest-ing indicators of the polantions of Irade in the various assumes of public and private business The service which they represent re office, every shop, every store, in short, every department of the bases in the country, and, to som extent, mirrors the activity that there exists. The revisal of business prosperity is the coming year is predicated as much upon the postal returns of the past field year as upon any other indication of Lenewed activity, and to the extent tipat they show this they are interest ing to the masses engerly, looking for the pron i ed revival of track ted revival it thate.

It is stown by figure; formshed by he nostal department that the pears between 1879 and 188 constituted a gliden era in the blistery of

pretni reverus. By llowing the panic of s revenue continued to show a small increase for a time, un if figurity the cose of the tast juar ter of 157; showed a decrease in postal revenues of a per cent and thus notwithstanding the enormous corresponde ce incident to the centenn daxpesition. During the years of expression depression that fell west this great financial but on ster kept fulfil filtally of the business substatus. at I twas not until the close of the seco quarter of 18, 1 that a marked revisal la 11 s business prespently of the country was indicated by the postal revenue. This increase couldness, the receipte of the last quarter of 1851 showing the receipte of the last quarter of 1851 showing the bitharto imparalleled increases of 16 per cont. The peaks receipts of the year ending september, 1852, showed an increase of 31 per cent, over those of the precedurg three jears, and the revenue for 1882 showed an increase of 40 per deut over that of 1870. The effects of brainess stagnation are seen in all of the exhibits of the postal service in the instances in the number of regulated latiers and parcels malled for the

ingt two years. The increase in the number of regulated lotters and parcels mailed for the year 1884 ever that or 1883 was only 6.2 per cent, and for 1883 as compared to 1884 there was a decrease of 18 per cent. The average annual rate of increase for the four years prior to July 1, 1889, was 18 55 per cent. In those was 6 per cent, and to 1885 there was a de-crease of 2.2 per cent. The average annual rate of increase for the four years prior to July 1 1889 was 52.7 per cent. on this class of ma laqually depressing results were seen in the statustics of the money order business. For the year ended June 34, 1834, as compared to the previous year, the rate of increase in the of domestid money priors issued was only 400 ent, and for the rear ended June 10, 1800.

there was a decrease o ... in per cent. as compared with the year ended Jane 30, 1884. For the four years prior to July 1, 1883, there an average annual nafteness of 745 per cent, and for the year 18:0 nions the increase over the previous year was 11. 1 per cent The results are still more conspicuous in the values of money orders sewed in this country and payable abroa! In the amount I these there was a decrease of (815r cent. for the pean anded lune 3), 1884, as compared to the previous persuad for the year on ed lune 30, 1885 the decrease was at the rate of 11 per cent ad compared to the pean and the rate of 11 per cent ad compared to the pean and the rate of 11 per cent ad compared to the pean and the rate of 11 per cent ad compared to the pean and the rate of 11 per cent ad compared to the pean and the rate of 11 per cent ad compared to the pean and the pean are paied to Irai The average annual rate ( crease for the territors presents to July I, 1881, was no pur read in 1885 alone there was an increase of 1 per cent, as compared to the gent it. They are decline in the value of foreign orders as suggestive of the link of our plotment on one the laboring classes of people by whom it a money der system is extens vely

A NECESSITY OF THE TIME There are many sound reasons why the general government should take upon itself the regulation of marriage, divorce and the disposition of cetates. In no other way can the laws which govern these important concerns he made unit form and equal in all the states of the Union, a

condition now very desirable, almost, indeed a necessity Ruirends and telegraphs have so extended business spaces that a man without being very rich u at own property in one form or another in a dozen states, and when, as it frenen ly bappens, diath leaves a widely scattered estate to the disposition of the law, ie job is complex and difficult. The cost of several independent estimate rutions y different courts and under different laws soft nathenry tax, as n when the property nyclied is not large. An where many courts with attendant snah officials, lawyers, c, are engaged, the chance of mamana.gement and even of dishonesty becomes a serious buzard induces any nep use of this question recently, he say branuss q chrows by pointer out that in rawing such a will as that of the late Month of the can play who existed the property in a community of the late of tozen stres, a snowledge of the and dec stops in such is requisite and that present no n an can be quite an a wast lo make a w if that i which register pright feaves to the devisees. In some states a lo, acy pf real state to an airen would be wild hause Here could not hold and salate In others the

rivilks of widows viry, etc.

This difference between the marriage and drawed and of the different states is the cause of num cites trouble. In the thirty-high states num effect trouble. In the thirty-right states there are thirty eight distinct sets of laws Running them o ar the Chronich tieds the Alabama recognizes eight causes of two readants as in, Cadrio ma eight, Curis men eleven, Delaware five Plorida aix, se igui deven, Illim is eight, Indiana eight, I wi eix, Karsas hine, Kentucky sixteen, Louisiana six, Mane four, Mardan i four Massachusotts seven Maine four, Marras 1 rour massiciniecta seven Michigan seven, M seouri eight, Nebruska seven Nevada seven, New Hampshite ten, New Jersey Nevada saven, New Haupshire ten, New Jersey two, New York (ne, Nerth Carolina four, Ohiosgi t, Oregon se e , Pennsylvania eight, Rhode Island seven, South (archina two, Transessee nine, Rexas six, Vernout seven, Vergina eight, Wea Virginia eight, Wisconsin aine Besides the cruves enumerated, courts in Hilmos and Indiana and in one or two other sates are authorized to grant discress when in the opini in of the court it would be better for the partise. There is a proportionate difference between there is a proportionate difference between these states in the laws relating directly to marriage. What constant as wallst marriage in one state is not considered marriage at a 1 in an other, and there his liwars been difficulty on this score For example, New York refures to recognize as legal a divorce granted in Induana, and hidden born of a marriage following such divorce are not halve to be legitimate in New York This not only avolves such offspring in York | This not only accessionally cheats them of inferitances to which they are justly entitled. To take these latters from the state, and make them subjects of us ional control, would lead to a manufacture an amondment to the national "onstitu n, and would no doubt be opposed by state's rights theorisis but when reform is jositively necessary there or ght to be no objection to the easy and only pain through which it can be brought about. The radronds and to egraphe have centralized the country, and must do it more and more

OUR SEWERACE SYSTEM.

I knowl I ve aften been critiched about my tackle They say your pole is crooked you ve an idd cot ton line and you ve arbiting but a pin-hook and you we pin to a pin gurge in the pin you we arbiting but a pin you we arbiting we arbiting arbiting

was construct. Thether any more was built uncer his enginering on not I am mathle to say without constitute the records, but he system tarted by Mr. Labersham condition to retter, with the eccessary catch basins, man cos, lamp holes and branches for house drainage. It was it e design at that time to playe a tipe sower in avery street, funning at right argie with the river as ast as abscessity seemed to require it. This is has has been carried out by each a needing council under the supervision of it and y surely council under the supervision of it and y surely council under the supervision of it and y surely council under the supervision of it and y surely council under the supervision of the company of the control of the company of the control of the control of the council of the council under the supervision of it and y surely council under the supervision of it and y surely council under the supervision of the council o

of sewers that have been laid in our city with a ranying capacity sufficient for at least five lines the amount that is now decharged into them, are showed to remain almost ide because here is no law to compel the people to connect with them. The sewers already constructed in the city have a milited carrying capacity suffice not for all least 100,000 people, were they all in the district where he sewers are laid. This would not in round numbers 165 bersons to eath sewer already laid, of which there are twenty-four now discharging into the Williamette river.

twenty-four now discharging into the Williamette river.

Experience has proven that by giving a sewer proper form and adjusting the size to the amount of sewerage it is expected to receive and carry off, it will become sel-deaneing. It is worse than a was so I noney to construct a sever highest respective than the amount to be callined, as it requires greater care and attention to keep it free from obstruction than I it is taxed to its full est capacity. As a general thing, where there is a sufficient cup by of water for done is the proposes, the liquid flow is sufficient, or nearly so, it keep the main a weep free. The fulling principle should be that each day a sew age of each a rear, is well as and dwellin, should be rear west from the cry this same day I its principle which is a sould pass of before decomposition begins. It is sentiaring the waste age of each is root, as well its actal dwithin should be reat yed from the cry the same day I its pr duction—that it should pass off before decomposition begins. It is sentential the waste maker to accentiate in the sewer that produces the rowing ages so and tous to maith, and therefore it should not be all went to remain within the city limits for even one day. It has also been demonstrated by experience that the greater the concentration i flor, the greater will be the cleans up nower of a sewer at any given mechantion. As the domestic sew age is comparatively small, the principal question to be considered in the construction of a sewer is the amount of storm water to be considered in the construction of a sewer is the amount of storm water to be considered in the sewer. It must countries the ratifall that reaches the sewer within the same bout in which it fails is it more than one half, but in Oreg 21, where for a considerable line during our wet season the group is the oughly saturated with water, the more han one half, but in Oregon, where to a considerable mas during our wet seasen the ground is the oughly saturated with water, the rainfult passes off much more rapidly, while on the other hand, extreme or large prodeptations for materials are less frequently other to a print of the remainder of the prodeptation of the remainder of the rema

If sto in water are less free and, so ther of perturb of the countries and resardy into a ling.

The city of Portland is built on an average in climiking of a bout fifty feet to the mile, is our ilcularly well studied as to sewering a twiction of the seen from the report of James P Kirkwoul, clief engineer of the Brooklyn board of water ominists near, that the size and quality of the events of Portland are, in the main, constructed on correct in neighbor the says. The pipes generally used in the Brooklyn sewarage works hat been aroug, sized catther ware pipes of twelve, afteen and office en achies in diameter. No phose of less than twelve inches in diameter. No phose of less than twelve inches in diameter.

sewers from dwellings do not exceed all names in diameter?"

Jan es Johnson, M. D., bealth officer of Milwubkee Wissen his report, saye "We have positive evidence of the advantage of the similippe eswers, it properly constructed to the work which large sewers falled to perform this was dumentarted by a sewer three feet wide with a fall of one foot in 118 feet, having the deposit of 1200 dwelling house emptying into it and permitting 1000 only feet per mouth in accommulate. This immense deposit was entirely obviated by a pipe sewer fiftwen induse in dainater, with a fall of one foot in 151. This signalls sewer that not feave an atom, of ma tor to

different was a same and of ma for to single sewer the not leave an atom of ma for to short at our fibrillustration of the proper aize of sewere. I will quote the following from the hieropolitan Sewerage commission of London, which rays. In the case of a sewer 51, feet it ghand 3 A feet with, draining an area at the night of 64 acres, a 12-inch pipe was inserted for 11 or the order of 2 and 12 and the wall was built cleaking ut the fillet and thus forcing the sewage from the while area to pass through the pipe. It was found that the diamage power of the pipe was twent; times that of the old sewer in proper is no tested to the old sewer to a very great extent, stone in the, etc., in fact, all natters are neal not it, were carried through. Other experiments demonstrate in the sewer was from 14 to 18 makes.

accumulation in basins in ket fresh, he will the reassement that warm, try weather sees in the persons and the warm, try weather sees in the persons and the warm, try weather sees in the persons and the warm, try weather sees in the persons of fitth, and not term, an inclining thapped off from sewer, served as verifiators.

Intestate of affairs should not be cherised for adds. The people involved that part of the city with the sewers included be in the person of a done of the prince of the person of the composition of the prince of the prince of the person of the constant of the prince of the prince of the person of the water supply for deprince of the person of the water supply for deprince of the person of the water supply for deprince of the person of the country of the decay in a sewer as the person of sew in a seven of the charge along the city front, which is a serious, e. but the city at the present time is he pies in the matter, as it would require a very large outlay to remery the evil. Should the city of a second within a reasonable time, the present to refer the switch is not probable within a reasonable time, the present system can very easily be connected with it, but whill such time the sewers should be extended with ron pie at extreme low water to it e outer limits of the locks along the city front would filthough the sawage flow far on 1 gb out in most cases to catch the current in perfect and he carried off. Even the swill it if no account of the back water from the daulable for a large sewer parallel with the riser, unless methal attil force should be used to counter out the large in the present case of a large sewer parallel with the riser, unless methal attil force should be used to counter out the large sewer parallel with the riser, unless methal attil force should be used to create a current of the counter of the should be used to create a current of the counter of the c

large sewer parallel with the river, unless me-chantal force should be u ed to create a cur rent
The city is naturally divided into for sewered districts, will I which can an ison it I server districts, will I which can an ison ill a servered by the me of pipes not fees train make; these and not exceeding eighteen inches in clameter Than purifyin south of him speed hid e constr

pot excepting eighteen inches in clameter That portion south of a rat street hid e constituting one district that part already a wered a second district that part lying on eith reide of Tonner creek a third district and in of the northwesterr part of the city the fourth district. By building a large brick sewern Tanner treek, which should be done immeniately, a very large district could be drained in oit very advantageously, and the natural field of water down that creek would at all three be sufficient to keep it occar and deposit the sewage into the result to ear and deposit the sewage into the result is effected viz. By building a cultert down blance received by two plans if desired viz. By building a cultert down Johns is screek and the extreme remember of Tunner's creek, and the extreme returned of Tunner's creek, and the extreme returned along the sewage into it from lither side, on the saw plan as that of Tunner's creek, and the extreme returned along the sewage from heing discharged along the river in it as it discharged on the saw rags from heing discharged along the river in it as it discharged less at an inclination whill we did render it extremely difficult to drain in any other direction, ban towards their

With the ratural divisions of the casy laken

With the ratural divisions of the chy taken not occoside atton, it would not seem difficult to a person at all acquainted with dramage to plant a very a mple and comparatively nexpensive system in sowerage. By adopting the natural sub-divisions outline to the dinglest sewer in the city need ook be 1) and every contribution of the contribution of the superior of the first sewer in the city size of the plant of the property of the city in next cises, a very size of lightnation, and is the length mod inclination of a sewer governs the city ing capacity, it will be really seen that great advantage and economy would see the plant of the plant of the considering the material most not side for sewering a purpose, it would seem hardly occessary to say that there is no material known of equil adaptation to virified, or pipe. The surface being smooth, had and unifor a offer less obstructions and climbs of a merital it within any other material, as has already been shown. As to durability, there is no a the stance more indestructive to the contribution.

ments then well various fore clay. The strpingest acids make no impression spons it.
To attain the nearest perfection possible in
the construction of a sewer, ring sipe should be
used for all mains, that is to say, straight pips
with a separate or loose ring in place of a fixel
socket. The advantage in the is to enable the
pips agent to see just what belie doing and the
superintencement to inspect the work more thoroughly

oughly
It is a sufaguard against fraud as with socket
pipe he joints can easily be drawn without delection and a considerable often gained to the

JANUARY 23, 1886.

Outry of the sewer The ends of the opper should be closely joined logether with as little terrent exposed of the where surface as possible, in he cembent will sook become distinguished by it esewer acids and gases, and teaves a crepton in he joints which will more or less obstunt the flow for all lexerals and insist drains acted the low for all lexerals and insist drains acted shill should be used in construction for the drains depend the life and health of the inmates of a household. Every pipe co meeting in house with the man health of the inmates of a household. Every pipe co meeting in the greatest and and wen inted through a metallic pipe executing to the rop of the building, thus en alting the four uses to pass off through the irit, this is will readily do, being lighter than the atmosphere. Thate should also be some piben adopted whereby the main sewer can be we inhated, other han through the catal history in the atmosphere in the transition of pipe in ist suitable for the prophest. Harrison street sewer, I may be allowed to express may hadgen the brief of pipe in ist suitable for the prophest. Harrison street sewer, I may be allowed to express may hadgen the brief of pipe in its first in the first of pipe in the flat at the four of the life of the prophest in the could convex to sput the grade from Thirt to Past Pak street. It would be almost impossible to convey e-ough matter through pipes; well carry from the point to the flat may be allowed to express the flat will be form the interest of the sample to carry the flow from abint as my judgment that a reighteen fact wire form the had the pipe form the pipes up to the first and would successful it will be flowed to express the flow and would successful it is based, as if has already been inached up normales case and resplict the a complete of the prophes on struction in the prophes up to which the research the season that is should be flat or required the sould be fared toward. THE VALUE OF LIBRARIES, after ion especially to the wise words with which the pussage closes.

Medians Through which Self Interaction may be Obtained—The Care that Should be Lose-med in Selecting Books to Read

of tames Russell Lowell, as minister to Eug land, at the dedication of the Chelsen free in

demaper apone trade of all kunds. To day the whres were up in r., tomuch to receive the build of delayed reports. These nate is better tone in wheat days at the first and, otherwise they contain outbing of new it terest. In the los at marked business is at stone distribution of the content of the content

—a society, ico, which will not involve them in rutious expenses and etill more rutious waste of time and health and faculties?

'Souther tells is that in his walk one stormy day he met an old woman, to whom, by way of greeting, he made the rather obvious remark that it was freadful weather. She answered philosophically that it her opinion 'any weather was better than none." I should be half inclined to saw that any realiting was better than none.

that it was dreadful weather. She answered philosophically that the repinion any weather was better than none? I should be half and ined to say that any reading was better than none, altrying the crudeness of the statement by the Yankee prover's which tells as that though 'all deacons are good, there's odds in ceacons. An ong books certainly there is much waristy of company, ranging from the best to the worst, from Pisto to Zoia, and the first bess in a reading well is that which teaches us to distinguish between literature and mere printed mitter. The choice lies wholly with ourselvee We have the key put into our bands shall we unlock the pantiry or the oratory? There is a Wallachian lagend, which, like most of the figments of popular fancy, has a morsal in it. One Bakaia, a good for nothing kind of fellow in his way, having had the luck to offer a sacrifice especially well pleasing to knowly sitting in something like the best room of a Wallachian peasant's cottage—there is siways something protoundly pathetic in the homeliness of the popular inagination forded, like the princess in the farry tale, to weare its seminance of gold tissues of to straw. On being asked what feward he desires for the good services he has done, Bakaia who has always passonately locked to be the owner of a bagoppe, assing a half worn-out one lying among some re bish in a curner of the room, hegs engely that it may be bestowed on tim. The lord, with a smile of pity at the meanness of his hore, grants him his boon, and Rafa a goes bruk to earth de lig ted with his prize. With an infinite possibility within his reach with the chiefe of wis due, as shakepeare says of the dyer's hand, to what it works in Cato's adver, cam bends and bus, as handers a good on the flower is and the material of hought reacts upon the thought itself. Shakespeare himself would have been common place had he been paddocked in a think-bawen woodaulary, and Frafas, had in a think-bawen woodaulary, and Frafas, had

OUR NATIONAL CAPITAL Miss Agres Dolph makes her Debut

Washington Somety A Brilliant Affair-Political Notes-Haw Represe

t re Hermate Got Rid of an

WASHINGTON, D. C., J. n. 15, 188

I the AND MRs J N Doll a MIN DOLPH At Elem I the day evening Jan. 12 from eagle to averyo elock—\$ Latayette banare.

Thus read the 650 invitations issued by Se tor and Mrs helph, to formally introduce is society their daughter, Miss Agnes. The or New England might that satisfact upon the Manging day of January 12 pinched the che and tinged red the cars of the greets as the same the same than the and tinged red the cars of the precises at drove to the spacious residence of Oregon's set for, tripped lightly over the carpet that had be laid from the street to the vestificial and cross the threshold of the doke. Once within, he ever, reaction followed. The sharp cold is sharpened their wite; their laughter was me and unfeigned, their eyes sparkled finely bot moved with rhy thinte, grace.

In issuing invitations to receptions in Waington it is haustly estimated that not more the two-thirds by the number invited will be prent. It was otherwise in this casu. Althou

two-mires in this case. Although the reception is the largest that Schater Doname for these rand hospitality that all persues who were ret enavolably detained by business of the companies of the convolabily detained by business. saw one," said he in his blont, somewhat pohshed manner as he enserged from the or in the duning room and stopped before an adjust his necktie. But the laughter went

adjust his necktie. But the laughter went of and the conversation and the masic, and the masic, and the masic, and the masic and the masic, and the masic an

Speaking of SKNATOR AND MRS. DOLPH.

The paper says 'They welcomed to their scious residence on historic Lafayetzs squar thoice guithering of the best knows people spend life. The entire house was given up. second life. The shufer spouse was given up the evening's enjoyment, being decorated fragrant blotsome and softly lighted by shad jets from cellar to dome. The entite first entwes occupied for conversation and promeand Sonator and Mrs. Bolph standing ment the strance to the main drawing room to welcon their gueste on enjoring, and presenting the metry, vivarious daughter and a number of hyoung triends who assisted in the receptual first. Bolph wore a transed robe of black sail with tabler of steel-bearded not, and landson trimmings o steel passamentries. The his Klizabeth truffle was edged by large a cell beaudingmonds glistened in her velvet neck-hand at a time in her bair. The debaraths, Bliza Boly were a white satin dress, made daucing fencil The front of its sairt was closely plated with foll drapery of elivered net. The low-necks wast was pred lift trimmed with clusters of a vired wheat which caught here and there i lace drapery on the skirt. She carried two in ones boughets, one of half white rosssand lift of the valley, and the other spikes of pure with source, New York and at home.

PORH OF FIVE VERSES the evening's enjoyment, being decorate

PORM OF FIVE VERSES Written specially for Miss Dolph's debut Theodore J. Erkerson of the United States ar

The lines use neatly printed on white sa The first and third varies read. Pair caughter of the vale and bill.
Where the Williamethe flows so clear,
Where the fall forest ethnes still
The tread of Western ploneer We greet thee on this festive night A4 full of hope and youthful siec then launchest forth, with prospects Thy bank to sail life a fitful sen.

At least two of the Washington Dapers ated that Miss Dolph is one of the landson this winter's building beauties.

Mirs. J B Morigomery assisted in the rection as did also Mise Odeneal. The form were blue such with a slashed front, disclosi a patticent of sliver brocads. The latter we with satin looped with narclasses blooms. M Odeneal is much admired in Washingtod.

Ambing the guests were Samtor and 'll Warr er Miller', Senator and Mrs. Cockrell', Senator and Mrs. Cockrell', Senator and Mrs. Cockrell', Senator and Mrs. Cockrell', Senator Mitel eli and daughter, Mrs. Handy, Set fors Harrison, Teller, Blackburn, Cullont, Storm Harrison, Teller, Rischburn, Collont and Mrs. Schotz Storm Harrison, Collont and Mrs. Schotz Field and Strong-jot the supreme can the seator vortees, the California representative generally, Miss Mary Wilson, Miss I a Ruchet's and Miss Paul, the Hree List name is sating in the reception.
